## TEST DETAILS

### Test Locations
- Wet & Dry: GPG Mireval (F), ATP Papenburg (D)
- Noise: Uni Neubiberg (D)
- Rolling Resistance: TÜV SÜD PS Garching (D)

### Test Vehicles
- Braking, LWG, Aquaplaning in curve: BMW X5 30d
- Handling: BMW X5 40d
- Noise: Audi Q7 3.0 TDI
- Aquaplaning straight-line: Mazda Tribute

### Procedure and Evaluation
- In all tests, the control tire is tested repeatedly in the progress of the test to detect and consider changes of the ambient test parameters and correct its performance by linear interpolation.
- Generally, all tires in a test are primarily evaluated in relation to the control tire.
- The performance is expressed as a percentage value, calculated on the basis of the measured and corrected test data.
- In this present evaluation, the performance of each tire is assessed relative to the reference tire (Dunlop ≙ 100%).
- In all evaluations, a percentage value $>100\%$ means better and $<100\%$ means worse.
AQUAPLANING STRAIGHT-LINE PERFORMANCE * [%]

- Water depth: ~ 8mm
- Aquaplaning speed at 15% slip difference
- Result Dunlop Sport Maxx RT2 SUV: Ø Aquaplaning speed: 70.5 km/h

*) The calculation of the percentage performance is based on the aquaplaning speed.
TEST RESULTS
